

PPE For Businesses

Note: for chain stores, call the individual store before going in. They are constantly running out and restocking PPE products.

Alternatives to Disposable Masks

The National Centers for Disease Control recommends cloth face coverings “fashioned from household items or made at home from common materials at low cost” to preserve N-95 respirators and surgical masks for healthcare workers. Commonly used alternatives include bandanas, hair wraps, scarves, t-shirts, and homemade cloth masks.

You can view a tutorial on how to make masks from various household items here:
